

# PRIORITIZE YOUR RISKS

Create a personalized plan for *your* church, *your* community

Make a list of all the risks your church might face, discuss the solutions and determine where to place those solutions on this grid. Assign more urgency to those addressing risks of higher probability and more costly consequences. (But don't put too many in quadrant No. 1 or you'll become overwhelmed before you start!) We've suggested a few to get you started.
